EDUCATION

P.R. Pote Patil College of Engineering and Management, Amravati

B.Tech – Computer Science & Engineering | Expected 2028

CGPA: 8.21/10

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, SQL

Web Development: HTML, CSS, React.js, Node.js, Express.js

Databases: MongoDB, MySQL

Tools: Git, GitHub, Linux

Cybersecurity: Computer Networking, Network Security Fundamentals

PROJECTS

Farm2Market — AI-Powered Smart Mandi Platform

- Led the team in designing the software structure and user workflow for a multilingual marketplace connecting farmers and buyers.
- Coordinated feature integration and performed functional testing to identify and resolve software errors across the platform.
- Technologies: React.js, Node.js, MongoDB, Python, Machine Learning, Google Maps API

WalkSmart — Smart Assistive Shoe

- Implemented the hardware architecture of a smart assistive shoe for visually impaired users to detect obstacles and environmental conditions.
- Integrated ultrasonic and rain sensors with Arduino/ESP32 and configured real-time buzzer-based alerts.
- Technologies: Arduino, ESP32, Ultrasonic Sensor, Rain Sensor, ESP RainMaker

Career Compass — Student Career Guidance Platform

- Led the project team and designed the system structure and user flow for a career guidance platform based on students' interests and strengths.
- Structured modules for career assessment, career matching, personalized roadmaps, and goal setting.
- Technologies: React.js, Node.js, Express.js, MongoDB

EXPERIENCE / INTERNSHIPS

EduSkills — Virtual Internships

- Completed virtual internship programs in Google Cloud Cybersecurity, Palo Alto Cybersecurity, Zscaler Networking, Juniper Networking Cloud, Google AI-ML, AWS Data Engineering, and Google Android Development.

ACHIEVEMENTS

- Secured 4th Prize at Devyatra Hackfest 2026, KDK Engineering College, Nagpur, winning a ₹5,000 team cash award.

CERTIFICATIONS & WORKSHOPS

- IIT Bombay — LLMs with Python Workshop

HACKATHONS / ACTIVITIES

- Navonmesh 26 Hackathon — Collaborated on an AI-assisted video-processing solution for analyzing CCTV footage and identifying potentially harmful activities in security-sensitive environments.
- Smart India Hackathon — Worked on problem statement SIH26033.
